

FULL STACK ENGINEER - INTERN

at Sylox - Build India's AI-Powered Data Security Platform

Company	Sylox Technologies
Position	Full Stack Engineer - Intern
Location	Baner, Pune
Start Date	June 2026 (Immediate Joiner)

The Opportunity

Remember when Razorpay had 3 engineers? Or when Postman was just an idea? That's where we are today.

Sylox is building IRIS - India's first AI-powered Data Security Posture Management (DSPM) platform that understands context, not just patterns. We're solving a Billion \$ problem that every enterprise faces: How do you secure data when you don't even know what data you have?

As our Engineer, you won't just write code - you'll architect the foundation of a product that will protect millions of users' data across India and beyond.

Why This Role is Special

Real Impact from Day 1

- Your code will be in the app within the first month
- Direct access to enterprise customers
- Shape product decisions, not just implement them
- Own entire features from concept to deployment

Unprecedented Growth

- Work directly with founders who've built products at Amazon and leading enterprises.
- Learn from advisors including leaders from data security veterans.
- 2 years here = 5-10 years at a large company.
- Build your personal brand as we build Sylox.

Forge the Future with Innovation.

Tech Stack You'll Master

Current Stack:

- **Frontend:** React, Next.js, TypeScript
- **Backend:** Python (FastAPI), Node.js
- **AI/ML:** LangChain, OpenAI, Claude APIs
- **Cloud:** GCP (primary), AWS, Azure
- **Database:** PostgreSQL, MongoDB, BigQuery, Ms SQL, Snowflake, Databricks

Your Influence: Don't love our stack? Convince us why we should change it. We value pragmatism over dogma.

What We're Looking For

Must-Haves

- 1-4 years building full-stack applications (or exceptional fresh grad).
- Fluent with AI coding assistants (Claude/Cursor/Copilot).
- Strong foundation in React + (Node.js OR Python).
- Deployed at least one application to the cloud.
- Bias for shipping over perfection.
- Available to start by March 2026.

Bonus Points

- Built data pipelines or worked with large datasets.
- Security mindset (even basic OWASP knowledge).
- Open-source contributions.
- Failed startup experience (we value lessons learned).
- Active on Twitter/LinkedIn tech community.

Culture Fit

- **Builder Mindset:** You'd rather ship imperfect code today than perfect code never.
- **Ownership Mentality:** You think like a founder, not an employee.
- **Learning Obsession:** You're excited by what you don't know yet.
- **Direct Communication:** You value clarity over politeness.
- **Risk Appetite:** You see uncertainty as opportunity.

WHAT WE OFFER:

- **Salary:** Competitive Salary
- **Learning:** Direct mentorship from founders
- **Growth:** Fast-track to Engineering Lead role
- **Impact:** Shape development strategy from the ground up
- **Culture:** Women-friendly, innovation-driven environment

Forge the Future with Innovation.

The Intangibles

- Shape a product from zero to one.
- Work directly with founders daily.
- No bureaucracy, no politics.
- Your ideas are implemented within days.
- Build something your parents will understand and be proud of.

Our Interview Process (Fast & Transparent)

Round 1: Let's Talk Tech (30 mins)

- Quick technical discussion.
- Your experience with AI tools.
- Why startups, why now?

Round 2: Build Together (60 mins)

- Live coding with AI assistance.
- System design for a DSPM feature.
- Code review of our existing code.

Round 3: Culture & Vision (60 mins)

- Meet the founders.
- Your questions were answered honestly.

Forge the Future with Innovation.

The Sylox Story

Founded by Dipal Panchal (CEO), Sylox is solving the data security crisis facing every modern enterprise. With the explosion of AI and data, companies have lost track of their sensitive information.

Our platform IRIS uses AI to understand data context - not just find patterns. Imagine asking "Show me all customer data that could be DPDP, GDPR sensitive" in plain English and getting accurate results across petabytes of data. That's what we're building.

Backed by industry veterans and with early customer validation, we're not just another startup - we're building the future of data security.

Ready to Build the Future?

If you've read this far and feel excited (maybe a little scared), you're exactly who we're looking for.

Apply Now:

- **Email:** careers@syloxlabs.com
- **Subject:** " Engineer - [Your Name]"
- **Include:** Resume + GitHub + One paragraph on why Sylox

Or Take the Fast Track:

- With your best piece of code and why you're perfect for this

P.S. - Three Things That Might Seal the Deal

1. **The Founders:** Dipal left Amazon and Vialto to make it happen.
2. **The Timing:** Data breaches cost companies ₹17.6 Cr on an average. Every company needs this yesterday.
3. **The Network:** Our advisors have built unicorns. Their guidance (and connections) will accelerate your career by 10x.

#BuildWithSylox #Engineer #StartupLife

Sylox is an equal opportunity employer. We celebrate diversity and are committed to creating an inclusive environment for all employees.
